

With the "Do Not Call" list, it has helped my family sleep well without hearing those annoying telemarketers who do scam people out of money. It's frustrating to know that people want that privelage(law) taken away from the people of NJ. Do you realize that if you take away the "Do Not Call" list, the telemarketers would call twice as much to a point where we as people will get scammed once again as well as want to NEVER pick up the phone. It's bad enough property taxes are too high, give us at least something to be happy about when we come home.
